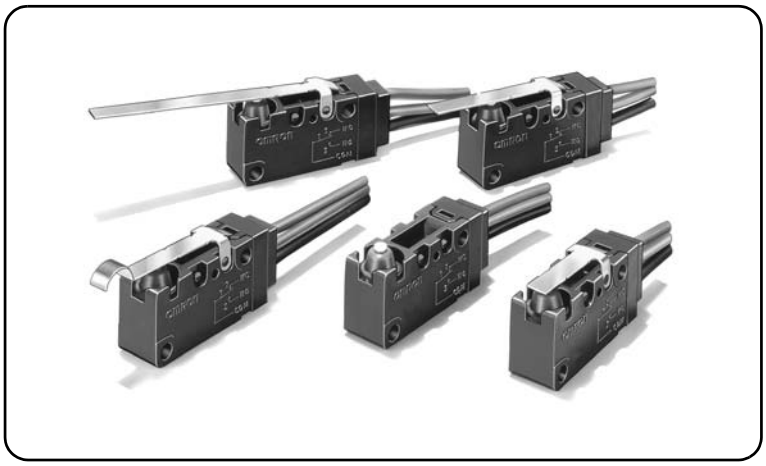
Sealed Miniature Basic Switch

Sealed Miniature Basic Switch Conforms to IP67 (Excluding the terminals on terminal models)



- **Use of epoxy resin assures stable sealing, making this switch ideal for places subject to water spray or excessive dust.**
- **V-series internal mechanism assures high precision and durability. The mounting is the same as of the V models.**
- **Ideal for automobiles, agricultural machines, large-scale home appliances, and industrial equipment, which require high environmental resistance.**

RoHS Compliant

Degree of protection	Terminal models	IEC IP67 (excluding the terminals on terminal models)	
	Molded lead wire models	IEC IP67	
Degree of protection against electric shock		Class I	
Proof tracking index (PTI)		175	
Ambient operating temperature		–40°C to +85°C (at ambient humidity of 60% max.) (with no icing or condensation)	
Ambient operating humidity		95% max. (for +5°C to +35°C)	
Weight		Approx. 7 g (for pin plunger models with terminals)	

Note. The data given above are initial values.
*1. The dielectric strength shown in the table indicates the value for models with a Separator (refer to "**Basic Switch Common Accessories**").
*2. For the pin plunger models, the above values apply for use at the free position and total travel position. For the lever models, they apply at the total travel position. Close or open circuit of the contact is 1 ms max.
*3. For testing conditions, consult your OMRON sales representative.

Precautions

★Please refer to "Basic Switches Common Precautions" for correct use.

Cautions

●Degree of Protection

Do not use the Switch underwater.
The Switch was tested and found to meet the conditions necessary to meet the following standard, however, the test checks for water intrusion after immersion for a specified time period, not for switching operation underwater.

JIS C0920:
Degrees of protection provided by enclosures of electrical apparatus (IP Code)
IEC 60529:
Degrees of protection provided by enclosures (IP Code)
Degree of protection: IP67
(check water intrusion after immersion for 30 min submerged 1 m underwater)

●Protection Against Chemicals

Prevent the Switch from coming into contact with oil or chemicals.
Otherwise, damage to or deterioration of Switch materials may result.

●Soldering

- Connecting to Solder Terminals
  When soldering the lead wire to the terminal, first insert the lead wire conductor through the terminal hole and then conduct soldering.
  Complete the soldering at the iron tip temperature between 350 to 400°C within 5 seconds, and do not apply any external force for 1 minute after soldering. Soldering at a excessively high temperature or soldering for more than 5 s may deteriorate the characteristics of the Switch.

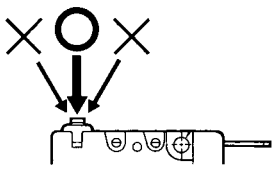
Correct Use

●Mounting

Use M3 mounting screw with plane washers or spring washers to securely mount the Switch. Tighten the screws to a torque of 0.39 to 0.59 N·m {4 to 6 kgf·cm}.

●Operating Body

With the pin plunger models, set the Switch so that the plunger can be pushed in from directly above. Since the plunger is covered with a rubber cap, applying a force from lateral directions may cause damage to the plunger or reduction in the sealing capability.



●Handling

Handle the Switch carefully so as not to break the sealing rubber.

●Using Micro Loads

Using a model for ordinary loads to open or close the contact of a micro load circuit may result in faulty contact. Use models that operate in the following range. However, even when using micro load models within the following operating range, if inrush current occurs when the contact is opened or closed, it may increase the contact wear and so decrease durability. Therefore, insert a contact protection circuit where necessary. The N-level reference value applies for the minimum applicable load. This value indicates the malfunction reference level for the reliability level of 60% (λ_{60}).
(JIS C5003)
The equation, $\lambda_{60}=0.5\times10^{-6}$/operations indicates that the estimated malfunction rate is less than $\frac{1}{2{,}000{,}000}$ operations with a reliability level of 60%.
